

The Pickleball Club has inaugurated a new president - Terry Holmsquist. After our long shutdown, Terry's goals include the Club becoming more active and social, as well as encouraging the integration of new players into our community.

A former Human Factors Engineer, Terry's work entailed making applications usable for the users when the engineers try to make it difficult. She interned and worked at NASA, earning her master's degree, and finished her career at Cadence Designs systems and PeopleSoft.

Terry moved to The Villages in 2007, retiring to enjoy her life with her new husband, Gary Holmquist. She has been extremely active here, on the board of the Italian Club, the Pool Committee, the OWLS, and very active playing Bocce and Golf. All this in addition to their love of travel and spending time with family.

After beginning Pickleball play in Green Valley, she was delighted to take it up again when the club began in 2015. Her enthusiasm grew, and quickly grew into a desire to become more involved in the club.

Not only is Terry an active player, she dedicates her time to ensure Pickleball is inclusive, fun, and safe by working with new players. She runs several of our Group Play sessions, working with Novice. The new players love both the encouragement and guidance they receive. They embrace the goal of having fun playing, meeting new people, and joining this friendly community.
